

## Special Event Guidelines Medical Plan

All special events permitted by the County must have a medical plan. The most basic plan for small events with a low medical risk assessment is the designation of an event representative to call 9-1-1, and a representative on-site with CPR training certification.

Events with a higher potential for risk are required to implement an appropriate medical plan to address the specific needs of the attendees and/or participants. Should Advanced Life Support (ALS) transport or staffing be needed at your event, you will be required to use Grand County Emergency Medical Services. Your event medical service provider should be familiar with this requirement.

To assist you in determining the appropriate type of medical services for your event, Grand County EMS has developed the following matrix of emergency medical services resources, which can be used as a guideline in developing your medical plan:

Emergency Medical Services Resource Matrix							
Event Type	Anticipated Crowd Size	Knowledge of 9-1-1 and CPR	Basic First Aid Stations	ALS First Aid Stations	Ambulance	Mobile Teams	On-site physician

This is only a guideline, you should evaluate your event also based on distance to additional medical resources and the risks involved. Grand County EMS reserves the right to define types of resources needed.

It is your responsibility to ensure that all medical support personnel whether paid or volunteer have the appropriate Utah licensing, certifications, and insurance to provide services at your event. 2 weeks prior to your event, medical personnel, names, and copies of their certifications should be emailed to [mvowles@grandcountyems.net](mailto:mvowles@grandcountyems.net)

Medical plans should include:

- Name and contact numbers for the medical services vendor
- Names and certification of the medical providers
- Dates and times the event will be held
- A map of the event with locations of first aid stations and other staging locations
- Communications plan for emergencies
- GPS coordinates for first aid locations and important intersections
- If the event is remote/backcountry, GPS location for at least one suitable landing zone (100'x100' clear area that is flat)

Grand County has final authority over your event medical services requirements and will evaluate these requirements based on a number of factors related to your event.
